INTRODUCTION

ECONOMIC UNCERTAINTY

Volatile factors such as inflation, fluctuating interest rates, and the risk of recession create unpredictable conditions that directly influence company performance and valuation.

RISKS IN DECISION MAKING

Those unpredictable conditions leave leadership at the risks and blind spots for strategic decision making.

CONCEPT OF SOLUTION : AI-POWERED BUSINESS INTELLIGENCE

- Simulates macroeconomic scenarios to assess business outcomes
- Analyzes key economic factors and their impact on company valuation, profitability, and capital strength.
- Goes beyond surface-level projections with deeper, data-driven insights
- Provides actionable insights for decision making

PAINPOINTS

01

lack of visibility under economic volatility

02

Ineffective scenario planning

03

difficulty aligning strategy with market forces

SOLUTIONS

Market-Aligned Strategy Mapping

Highlights where your strategy is drifting from market reality and recommends course corrections in real time.

Integrated Macroeconomic-Driven Scenario Planning

A clear, forward-looking view of how macroeconomic factors can impact the company—turning volatility into a manageable, measurable variable.

AI-Powered Multi-Scenario Simulation Framework

AI-driven simulations that generate multiple “what-if” scenarios—ranging from optimistic to worst-case—based on macroeconomic shifts and industry-specific dynamics

KEY BENEFITS

**RESILIENCE AGAINST
VOLATILITY**

**SMARTER, DATA-
DRIVEN DECISIONS**

**MARKET-VALIDATED
STRATEGIES**

**FUTURE-PROOF
STRATEGIC PLANNING**

OUR INNOVATIVE TECHNOLOGY

01

Explainable Financial AI

03

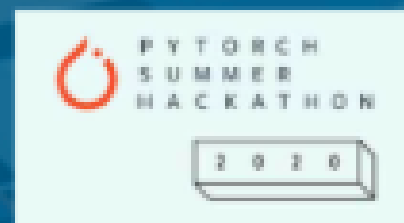

Industry Specific Expert System

02

AI-Driven Business Intelligence Model

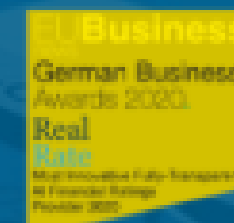

German AI startups

PyTorch Summer Hackathon
2020

Top 25 Insurtech CEOs 2020

German Business Award 2020

OUR VALUES

▶ **TRANSPARENCY**

▶ **RELIABILITY**

▶ **EFFICIENCY**

▶ **INNOVATION**

▶ **CONVENIENCE**
